

Measurement Engineers Since 1836

Stephen R. Wassersug, Director
Hazardous Waste Management Division
United States Environmental Protection Agency
814 Chestnut Building
Philadelphia, Pennsylvania 19107

Hozardous Weste Management Division EPA - Region III

Subject: 34W33 Request for Information on S.W.M.U.s at our Facility

The American Meter plant at Erie originally applied for a Treatment Storage and Disposal permit along with our Generator Status because we did not know if shipment within 90 days would be possible. On February 11, 1985 I formally notified the Pennsylvania Department of Environmental Resources that we wished to change our status to that of Generator only. A copy of the letter and notification forms are included. In paragraph two of the letter our shipping activity is outlined.

The second group of items I am supplying you are copies of our Hazardous Waste Summary Reports for 1982, 1983, 1984, and 1985 that show our disposal activity for those years. These internal documents show that we have actually been operating as only a Generator.

The third group of items being provided are 2 inspection reports from the Pennsylvania Department of Environmental Resources dated 2-25-83 for Generator and T.S.D. inspection and two inspection reports dated 10-4-83. In the T.S.D. report under comments it is stated that we were functioning as a Generator and that the inspection revealed no need for a closure plan. The inspection of 10-4-83 confirms that in fact we were operating only as a Generator.

Also included is copy of a letter from the D.E.R. dated 10-5-83 stating that based on the inspection the plant would no longer be considered a T.S.D. facility.

I feel the information being supplied show that American Meter Co., Erie plant fits into the catagory of facilities that never actually operated as a storage or treatment facility. In addition to this our facility does not fit into your definition of a solid waste management unit in my opinion.

Please contact me if any further information is required.

I certify under penalty of law that this document and its attachments were prepared under my supervision or direction in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted; based on my inquiry of the persons who manage the system or those persons directly responsible for gathering the information, the information submitted is to the best of my knowledge and belief true, accurate and complete. I am aware that there are significant penalties for submitting false information including the possibility of fine and imprisonment for knowing violation.

Pennsylvania Department of
Environmental Resources
Bureau of Solid Waste Management
Post Office Box 2063
Harrisburg, PA 17120

#### Gentlemen:

,,,

The attached Hazardous Waste Activity Form ER SWN-53 will serve to notify the Pennsylvania Department of Environmental Resources of a change in status by the Singer - American Meter Division, Erie, Pennsylvania EPA I.D. Number PAD 050942291 to a generator activity only from the previous status of generate and storage activity.

Originally, the intent of the Erie Plant was to obtain a Generate and Storage Permit to be able to store hazardous wastes over the ninety (90) day period. Since November, 1981, we have not had any problem in disposing of hazardous wastes within the ninety (90) day limit and therefore feel that the Generate, Store, Transport and Disposal Status will not be required.

If more information is required, please notify the writer at your convenience.

Sincerely yours,

D. D. Jackson

Manager of Industrial Engineering

### COMMONWEALTH OF PENNSYLVANIA DEPARTMENT OF ENVIRONMENTAL RESOURCES

1012 Water Street Meadville, Pennsylvania 16335 Telephone: A. C. 814/724-8557 October 5, 1983

Subject: Hazardous Waste Inspection

Singer, American Meter

ID #PAD050942291

City of Erie, Erie County

Mr. David D. Jackson Singer, American Meter Division P. O. Box 1251 920 Payne Avenue Erie, Pennsylvania 16512

Dear Mr. Jackson:

Enclosed you will find inspection reports for an inspection of Singer's American Meter Division facility on October 4, 1983. At that time, labelling violations of the Hazardous Waste Regulations adopted on September 4, 1982 pursuant to the Pennsylvania Solid Waste Management Act of July 7, 1980 (Act 97) and Chapter 75, Rules & Regulations for Solid Waste Management, were observed. That violation concerns proper labelling of drums used to accumulate and store waste within the Singer plant [see Section 75.262(f)(1)(iii), the comments on the generator inspection report].

Based upon that inspection, you will shortly be receiving official notification from the Department that Singer's Erie facility is no longer an interim status hazardous waste storage facility. Your facility will be subject to the regulations listed under Section 75.262, as long as hazardous wastes are stored on-site for ninety (90) days or less.

Please feel free to contact me at this office, if you have any questions concerning this matter.

Sincerely,

Mark E. Gorman

Solid Waste Specialist

Bureau of Solid Waste Management

Re: PAD 050942291

Dear Mr. Jackson:

Sections 3004(u) and 3008(h) of the Hazardous and Solid Waste Amendments of 1984 (RCRA Reauthorization) give EPA the authority to require corrective action for all releases of hazardous wastes or constituents from any solid waste management unit ("SWMU") as defined on the enclosed sheet. This requirement applies to operating units, inactive units, as well as those that are closing or have been closed in the past.

EPA and the State must first determine the location of all SWMUs at your facility. Next, we must determine whether or not any "releases" (see definitions) originated at these units. In order to enable us to make these determinations, you must provide the following information:

- (1) A topographic map showing the facility and a distance of 1,000 feet around it, at a scale of one-inch equal to not more than 200 feet. In addition to showing the location of the hazardous waste management facilities for which you are seeking a permit, it must locate all existing and former SWMUs at your facility.
- (2) For each SWMU, provide a description of the unit's functions, material of construction, dimensions, capacity, ancillary systems (piping), etc. If available, provide engineering drawings of the units and their foundations. For closed facilities, also provide

All information you submit should be certified as required by regulation 40 C.F.R. 270.11(d). Should you have any questions concerning this letter, please contact Samuel Israel at (215) 597-9809.

Sincerely,

Stephen R. Wassersug, Director Hazardous Waste Management Division
